Ikea Home Planner

The Good	The Bad	The Bottomline
<p>You can use it online. Easy to understand and clear interface. You can change all the sizes of the objects, so you can really make your own room. You can see the 2D and 3D image of the room. There is also an app you can download.</p>	<p>It's a little slow, maybe because I used the online version. It takes a long time to place a new object. Also the images are not sharp, you can see the pixels. You have to sign up if you want to save something. Limited color options.</p>	<p>It is useful for people who want to (re)design their house or room. They can try if certain objects fits in their house, and create an idea of how it would look like, before they really have to buy something. It is also nice to try different solutions for your interior. ...</p>

Testing the tool (learning by doing — trial and error) What would/could a designer use this tool for?

Use this tool for designing an exhibition.

Depending on what kind of free this tool is, how "free" is this tool really?

You don't have to pay for the app or the online version, but you have to sign up and pay if you want to save your design.
