Krita

The Good	The Bad	The Bottomline
<p>A clear layout makes it easy to find your way around. The interface of adjusting the brush is even better than in any Adobe program. It seems to be more fluid with more options. The mirroring option while drawing can be quite helpful aswell, primarily when someone is working on some pattern.</p>	<p>All in all the interface looks pretty good but in a way it feels not that fluid in a way. It seems a bit outdated.</p>	<p>Its definitely a helpful tool for people that are drawing a lot. Customizing brushes and the many options that are available for those makes it a nice program.</p>

Review

The user interface:

Especially when someone is used to Adobe programmes, it's easy to find your way around in Krita. Everything is clearly marked. You even get the possibility to rearrange the function tabs and therefor create a workspace that fits your own needs.

Tutorials / Instructions:

useful / helpful : 4

clear : 5

quick and easy to understand : 5

What notable things do other users say about this tool? (either good or bad!)

I'm really, really, rooting for Krita, it has super potential. While I've used Linux and even like a few aspects about it, Windows 7 and the programs I use on it are a better production fit for me. The versions of Krita I have tried are great but not polished enough (on windows) that would pull me away from photoshop. Although Krita is about 95 percent there (as far as me using it fully), it just needs a few more touches. I wish I could program - so many ideas on things that could be improved with Krita. If the next iteration of Krita is stable and the transform tools are quicker - look for

a tutorial by me soon. - Artmessiah, Mon Sep 10, 2012 on forum.kde.org

Testing the tool (learning by doing — trial and error) What would/could a designer use this tool for?

It's a good tool for drawing and testing different materials and brush

Depending on what kind of free this tool is, how "free" is this tool really?

Once downloaded no advertising or anything is popping up. Only on the website theres a donation bar to help the krita foundation which isn't annoying at all. (Actually it's quite interesting)
