Review

The user interface:

one of the easiest tools I've ever used. you can easily proofread your text and correct the errors directly. it also shows stylistic issues. LanguageTool is a proofreading service for English, German, Polish, Russian, and more than 20 other languages.

Tasting the tool (learning by doing — trial and error) What would/could a designer use this tool for?

To proofread your text for example e-mails, letters, text in your portfolio, text on your website...

Depending on what kind of free this tool is, how "free" is this tool really?

It is totally free in my opinion. I've never had pushing advertising.

Please add any additional comments below:

I really do recommend to use languagetool.org --- it's a nice toll for the daily life.

As an official reviewer for the Great Free Graphic Software Review I confirm I have filled in the above review at the best of my abilities, with care, patience and without prior prejudice, so help me Tux.
