What notable things do other users say about this tool? (either good or bad!)

It's amazing program, you can create visual anything with your crazy ideas in your head, cool performance and design by processing, thank you from me

Testing the tool (learning by doing — trial and error) What would/could a designer use this tool for?

You can use this tool to make visuals. For example a animation. You can use this tool to learn code.

Depending on what kind of free this tool is, how "free" is this tool really?

It's a free download
